

Together with WITTMANN BATTENFELD GmbH, ICE Flex leads the MES software market for the plastics and rubber industries – all thanks to the iconic TEMI series of products.

Industry 4.0 spurred on the ICE Flex beginnings in Italy – and now we supply the most advanced technologies for plastics processing worldwide.

# TEMI MEDIA MENU

## House Menu

### Can't decide where to start?

See the entire series of TEMI+ videos on one link.

Entire series ..... EN | DE | IT | FR

## For Starters

### MES introduction ..... EN | DE | IT | FR

What is a Manufacturing Execution System (MES)? How can it benefit me? This video helps to answer the questions.

### Module by module ..... EN | DE | IT | FR

Everyone's issues are different. This video explores how various MES modules can assist a number of plastics processing needs.

### The STANDARD package ..... EN | DE | IT | FR

For us, standard does not mean basic: Check out how the TEMI+ Standard package can deliver value right across your business.

### The ADVANCED package ..... EN | DE | IT | FR

This comprehensive package gets results in all areas, including Quality Management, Mold Management, Alert Systems and much more. Check it out here.

### The CONNECT Package ..... EN | DE | IT | FR

Many businesses are driven by an Enterprise Resource Planning (ERP) but very few manage to go the extra mile and connect with their MES operations. See how you can do just that here – via the ERP Connector and TEMI+.

## Chef's recommendation

### KEY Values ..... EN | DE | IT | FR

What are the benefits from introducing TEMI+ to your business? This short video provides an overview.

## Take The Factory Tour!

### www.temiplus.com

Click on www.temiplus.com and take our virtual factory tour yourself! You can see the system working – complete with all its features – and get a 'hands on' user experience. It's a virtual experience and so you can create your own reality yourself. For best results we recommend accessing the site via Google Chrome. And simply ask your local sales agent for your user-name and password.

### IMAGOxt ..... EN | DE | IT | FR

Click on Energy button in TEMI+ virtual factory to have access to this package.

If your business has energy monitoring and usage issues, then the IMAGOxt package is just the place to start. Within this suite you will be able to check and monitor a variety of energy meters (Modbus, OPC-UA, signals) and also metrics such as temperature, humidity and other factors. All of this data will be organized into customizable dashboards, and everything will be connected to the TEMI+ main page.

### Some links in this menu are clickable!

By clicking on your language icon – or the reference web link – you will be automatically redirected to the YouTube video or webpage.

We love creating software – just for your business!
