

Wittmann

Minimum consumption.
Maximum efficiency.

We will help you to keep your energy under control!

Energy consulting from WITTMANN

For many years, efficient use of energy has been one of WITTMANN BATTENFELD's top priorities. From the very beginning, we have focused on optimizing energy consumption in developing our PowerSeries machines. Our energy consulting packages are based on many years of practical experience in energy optimization.

Your advantages from future-oriented technologies:

- » energy savings and conservation of water and air resources
- » reduction of your carbon footprint
- » possibilities to benefit from public promotion programs

Rely on our consistent machine concept with servo drives, linear guides, KERS and energy-efficient auxiliaries!

Energy consulting packages:

Basic

Analysis of your injection molding process

Plus

Analysis of your injection molding process including auxiliaries

Premium

Analysis and optimization of your injection molding process including auxiliaries

Your WITTMANN partner will be glad to inform you about further details!
